Instructor:

John Mattox
Office: 103 Benton Hall
Email: **mattoxj@miamioh.edu (mailto:mattoxj@miamioh.edu)**

Instructor office hours:

Online help	For seeking help or clarifying questions on homework always start with the Canvas Discussion forums on Canvas. The discussion forums should be your first step for seeking help electronically because any questions you have are probably shared by many other students as well so asking (and answering them) on a shared forum will be quicker and more beneficial for everyone.
Scheduled office hours:	MW 10:30 – 11:30 Th 10:30 – 11:30 F 10:30 – 11:30 In Benton 103 Door is always locked, so knock and I will open it (it is a shared office)
By Appointment:	Send me an email 24 hours in advance to set up an appointment. Unless you receive an acknowledgment from me, do not assume that the meeting is set up. I am very flexible to me with you at any time that works for you, you just need to give me enough time to see the email and confirm the appointment.
Open door policy during labs:	You are always welcome knock on my door if I'm in my office and use the laboratory to seek help. Prefer to post questions on Canvas Discussions.

Teaching Assistants:

- Daniel Tai: Th 2:15 - 4:05
  - taidj@miamioh.ed
  - Office hours: Monday 4:00 - 5:30 pm Armstrong Meeting Room 2060 or **Zoom (https://miamioh.zoom.us/s/5607613867)**
- Mika Burmester: Th, Fr 12:05 - 2:00
  - burmesmt@miamioh.edu
- Samuel Asebrook: Fr 2:15 - 4:05
  - **asebrosg@miamioh.edu (mailto:asebrosg@miamioh.edu)**

Important Dates:

Event	Date
Class begins	Mon August 22
Labor day (no class)	Mon September 5
Last date to drop this course (no grade on transcript):	Fri September 9
Fall Break	Fri-Sun October 7-9

Last date to withdraw from the course ("W" on transcript): Mon October 24

Last day of class:	Fri December 2
Midterm exam1:	Section I,K : Th, Sept 15th Section J,L : Fri, Sept 16th
Midterm exam2:	October 5th For all sections
Midterm exam3:	Section I,K : Nov 3rd Section J,L : Nov 4th
Final Exam:	Sections: All sections December 6 10:15 - 12:15 Hughes Laboratories 141

Tentative Schedule

Here is a tentative schedule for this course. I will suitably pace the course as the semester progresses. Exam dates will not change.

- **Week 1 [Aug 22- 26]: Getting Started With Java Programming**
- **Week 2 [Aug 29- Sep 2]: Basic Language Elements I (Basics, Primitives, Strings, Conversion)**
- **Week 3 [Sep 5-9]: Basic Language Elements II (Interactive and Text File I/O)**
  - No class on Monday - labor day (sep 5)
  - Homework1 (covering weeks 1 & 2) due on Wednesday at midnight
- **Week 4 [Sep 12-16]: Control Structures I (Conditionals) & Basic Testing**
  - Exam1 (covering weeks 1 & 2 & 3) on Lab at end of week
- **Week 5 [Sep 19-23]: Control Structures II (Loops Part 1)**
- **Week 6 [Sep 26-30]: Control Structures III (Loops Part 2, Exception Handling)**
  - Homework2 (covering weeks 3 & 4 & 5) due on Wednesday at midnight
- **Week 7 [Oct 3-7]: Testing And Debugging**
  - Exam2 (covering weeks 4 & 5 & 6) on Wednesday during normal lecture time.
  - No labs because of Fall Break (Oct 7-9)
- **Week 8 [Oct 10-14]: Static Methods - Part I**
- **Week 9 [Oct 17-21]: Static Methods - Part II**
- **Week 10 [Oct 24-28]: Introduction to Objects**
  - Homework3 (covering weeks 6 & 7 & 8 & 9) due on Sunday
- **Week 11 [Oct 31- Nov 4]: Defining and using one and 2D-Arrays**
  - Exam3 (covering weeks 7 & 8 & 9 & 10) on Lab at end of week
- **Week 12 [Nov 7-11]: Array Algorithms & Array of Objects & Search Algorithms**
- **Week 13 [Nov 14-18]: Sorting Algorithms & ArrayList**
- **Week 14 [Nov 21-25]: Thanksgiving**
  - Thanksgiving starts on Tue 23
- **Week 15 [Nov 28- Dec 2]: Review & Practice for the Final Exam**
  - Homework4 (covering 10 & 11 & 12 & 13 & 14) due on Monday Dec 2 at 11:59pm
- **Final exam: Dec 6 10:15 - 12:15**

Prerequisites:

1. Earn a grade of C or better in MTH 102, or an ACT Math Score of 22 or higher, or an SAT Math Score of 530 or higher, or a Miami International Math Placement Test score of 8 or higher, or a Miami Precalc Placement Test score of 8 or higher, or successful completion of MTH 025. Or:
   Prerequisite or Co-requisite: MTH 125 or MTH 151 or MTH 249 or MTH 251.
2. Excellent knowledge of using online resources, websites, manuals, etc.

Textbook:

"Big Java: Late Objects, 2nd Edition" by Cay S. Horstmann. John Wiley & Sons, July 29, 2008 (ISBN: ISBN: 978-1-119-32107-1). You are not required to own a copy of the textbook.

Required development environment:

In this course, we will be using the jGRASP for Java programming & debugging.

You will need to install jGRASP on your computer (lab computers will have jGRASP pre-installed)

You will also need to configure jGRASP as shown in the adjacent video.

Additional References:

Submitting via CODE plug-in: https://code.cec.miamioh.edu/code

Important reference material on Canvas:

Commonly used Java methods (reference sheet used in Exams):

Attendance Policy:

No student, faculty, staff member who is ill or has been in close contact with an individual who has tested positive for COVID-19 should attend class or come to campus. I will, without prejudice, provide students with reasonable opportunities for completing missed work. However, students are ultimately responsible for material covered in class, regardless of whether the student is absent or present. If your absence is of significant duration or severity, as your instructor, I will advise you about other options that might be available including dropping the course or requesting a medical withdrawal.

The following attendance expectations will apply to lectures and class activities:

- Attendance is 10% of your overall grade. You can easily secure 10% of you overall grade by attending your classes.
- Attendance is required for every lecture and class activity.
- You are expected to be on time for every lecture and/or class activity/lab.
- You are expected to focus on course materials and not cause unnecessary distractions that may disrupt the class experience for other students. Consequently, avoid the use of extraneous electronic devices during lectures or class activities.
- **You are allowed to miss 3 lectures or class activities/lab overall and you will not lose any points for that. You can use this option for emergencies and unexpected incidents such as: getting sick or attending a family gathering or holiday.**
- ☛ **Cumulative absence of 6 or more days (lectures and class activities/lab combined) may result in being dropped from the course even if drop/withdrawal deadlines have elapsed.** In this situation your instructor decides if you still can continue the course after missing equally 2 weeks worth of material.
- *Excused Absence*:

- The 3 classes that you are allowed to miss are your only acceptable/excused absences that you can have, which you get to manage yourself. If you miss 3 classes for no reason and then something happens after that, even if you entitled yourself for being excused, you will still lose points for any absence more than 3.
- Understand that there are no make-ups for missed quizzes, exams, or other in-class work. The missed in-class work will be marked with a zero score and will impact your overall grades.

- *Weather & Other Emergency Closing*: In the case of unplanned weather or other emergency closings, all the policies and procedures of the University will be followed, as stipulated in **Emergency Procedures (http://miamioh.edu/campus-safety/emergency-procedures/)**. It is your responsibility to track emergency notifications from the University to determine if classes are canceled. University policy does not excuse missing even one class due to weather issues near your residence or travel route. Consequently, when classes are not canceled by the University but you have a weather emergency near your residence, then use your discretion on attending while noting that it is not an excused absence (as per University policy) and any in-class work will be marked with a zero score.

Grade distribution:

This class includes a variety of exercises designed to facilitate your understanding of a broad range of systems concepts. The course includes several homework assignments some of which most will be programming assignments. The grade distribution for the various categories is shown in the table below:

Category	Weight
Lecture attendance and discussion participation (see Attendance Policy)	10%
Weekly review quizzes (to be completed by the student outside class hours)	10%
Class activities/Labs (to be completed during class activity sessions)	15%
Homework / Programming projects	15%
Midterm Exam	30%
Final Exam	20%

Grade scale:

Your final letter grade in this course will be determined as shown in the table below. Note that, there will absolutely be no grade curving!

Weighted Score	Grade	Weighted Score	Grade	Weighted Score	Grade
97-100	A+	92-96.99	A	90-91.99	A-
87-89.99	B+	84-86.99	B	80-82.99	B-
77-79.99	C+	74-76.99	C	70-72.99	C-
67-69.99	D+	64-66.99	D	60-62.99	D-
0-59.99	F				

Interacting with TAs & graders:

Your course may include TAs or graders who will work with your instructor to provide you with the best educational experience and all the support possible to help you succeed in the course. However, it is imperative to remember the following important protocols when interacting with TAs:

- The TAs maybe your friends outside the class settings. However, in all aspects directly or indirectly related to the course, they are to be treated as if they were your instructor.
- It is important to remember that the TAs/graders are employees of Miami University. Therefore, they have legal protection (and obligations that go with it) from the University and they can seek legal resources for any forms of discrimination or untoward conduct.
- The role of the TAs/graders is to help you learn. They are clearly instructed not to provide solutions or respond to questions like "*I don't understand this problem*" or "*Can you explain the homework to me?*" etc. For such questions, you should work with your instructor during office hours. Consequently, asking the TA "Can you give me the answer to this question?" violates ethical conduct expected from you. Instead, the question should be "Can you help me troubleshoot this problem?"
- The TAs/graders do not have any role in policy matters, due dates, deadlines, grade disputes, etc. If a question does not solicit help, you should not be sending them to a TA/grader. For example, emailed delayed submission to a TA violates ethical conduct expected from you.

Policies for Homework:

Most of the homework will require designing and implementing programs. In addition, several programming exercises will require report writing about the programs. Furthermore, certain homework may require additional reading and writing essays. The following policies will be strictly followed for all homework:

- *General homework policies*:
  - They are due at Wednesdays at midnight.
  - Will accept submission up to 24-hours late, but with a 20% penalty.
  - ☛ Starting early is critical for successfully completing the homework.
  - Work alone. You may help one another with ideas in spoken language or with compiler errors. **Do not share/copy source code, including from those on the internet**.
  - Use the Canvas online discussion forums for homework to seek general clarifications or help to troubleshoot a specific compiler error.
  - All programs must adhere to good programming practices, style (see **CSE Programming Style Guide (http://miamioh.edu/cec/academics/departments/cse/academics/programming-style/index.html)**), and use good documentation suitable for a particular language.
- *Coding standards*: All programs must adhere to good programming practices, particularly:

1. Coding practices (see **CSE Programming Style Guidelines (http://miamioh.edu/cec/academics/departments/cse/academics/programming-style/index.html)**) will be enforced in the course using automatic scripts.
2. Use good documentation suitable for a particular language.
3. Must contain a design that is clear and concise.

- *Late submission*: Delayed submissions (*i.e.*, more than 24-hours after the deadline) of a homework assignment **will not be accepted**, unless:
  - You have documented medical reasons clearly explaining the reason for missing deadlines. In the case of medical issues, you must meet with me in person, preferably with a doctor's note, and discuss the situation.
  - You have documented evidence indicating family issues, death, or a funeral in your family/friend.
- *Grading practices*: The following grading rubric will be adopted for all programming assignments in addition to any other rubrics specified with each assignment:
  - All programming problems must be submitted via the Canvas CODE plug-in.
  - Failure to comply with turn-in procedures or file naming conventions will not be tolerated and will be assigned a zero score.
  - Programs that do not even compile or link will be assigned a zero score.
  - Programs and scripts that do not operate correctly for stipulated base-case or minimum-requirements inputs (if any) will be assigned a zero grade!
- *Outside Help*: Discussion of course-related material is encouraged. However, sharing of assignments and/or answers is strictly prohibited. Students are expected to use good judgment with regard to receiving outside help. Programs that are essentially identical are considered to be the work of another and will be treated as academic dishonesty. Please refer to the **Miami Student Handbook (http://www.miami.muohio.edu/documents_and_policies/handbook/)** for a detailed description of student expectations.
- *Help via Emails*: I will provide help and direction for programming projects via email. However, the following policy applies to obtain help via email for homework related issues:
  - During the last 24 hours, It's better if you meet me during office hours to get help to troubleshoot your program.
  - Response to emails received after business hours (8-5), during holidays, and weekends will be sporadic.

Plagiarism and Academic Dishonesty Policies:

At Miami University we take plagiarism and academic dishonesty very seriously. All of your submissions will be run through a plagiarism detection AI that uses all submissions for the past 4-years to detect plagiarism. Any student suspected of plagiarizing other's work will be reported as per **Miami University's academic integrity policy (https://miamioh.edu/policy-library/students/undergraduate/academic-regulations/academic-integrity.html)**.

In the CSE department, the default/minimum penalty for any instance of academic dishonesty will be a zero on the assignment AND a reduction of a letter grade in the course. This will be the case whether the judgment is reached in the Office of Academic Integrity or by the chair of CSE.

Exam Policies:

- *General Policies*: A midterm exam and a final exam will be administered for this course. **The only acceptable excuse for missing the scheduled exam and to request a makeup exam is that it conflicts with another course**. The rule is that when 2 courses have exam conflict, the one with the higher course number needs to provide a new time for the student. I will excuse only those for whom there is no other alternative. Begin to arrange your schedule now (work, meetings, interviews, etc.). If you require a makeup exam, you must obtain written (via email) permission from me prior to the test. Unexcused, missed exams will be recorded with zero points.

  The exams will be closed book and closed notes. But your will be allowed a single sheet of notes. No electronic devices are permitted during exams. However, electronic devices for life support or medical equipment will be permitted when appropriate documentation is provided.
- *Makeup Exams*: Requesting makeup exams/quizzes is discouraged and will be allowed only under the following extraordinary circumstances:
  1. An unexpected, documented medical emergency arises
  2. Provable extenuating circumstances.

Note, that makeup exam are not guaranteed and require a legitimate, documented reason. In all cases, students are responsible for informing the instructor no later than 24 hours prior to a scheduled exam.

- *Final Exam Policy*: The University policy for the final exam is that no exam may be administered early except with written permission from the Associate Dean of the division. **This permission is typically not given except under extraordinary circumstances**.

Quizzes

- Quizzes are assigned every week on Monday morning and are due Sunday at 11:59 pm
- No late quizzes are accepted
- Quizzes are on Canvas
- Quizzes are open-book and open-notes and open-jGrasp. You are encouraged to make full use of all these recourses to complete the quizzes
- Quizzes are not timed and you have three attempts at them.
- At the end of the semester, your lowest two quiz scores will be dropped and will not count towards your final grade.

Labs

- Labs open Thursday morning and are due Sunday at 11:59 pm
- No late labs are accepted
- Labs are to be submitted through Canvas using the CODE plugin unless otherwise noted.
- Attendance of the lab session is expected though not formally recorded.
- At the end of the semester, your lowest two lab scores will be dropped and will not count towards your final grade.

Student disability accommodations

- Consistent with Miami University policies, I am committed to providing accommodations as per Miami's **Student Disability Services (https://miamioh.edu/student-life/sds/)** policies.
- If you are a student with a disability and feel you may need a reasonable accommodation to fulfill the essential functions of this course, you are encouraged to contact **Student Disability Services (SDS) (https://miamioh.edu/student-life/sds/)**. SDS provides accommodations and services for students with a variety of disabilities, including physical, medical, and psychiatric disabilities. You are encouraged to contact SDS to learn more about registration and procedures for requesting accommodations. Email: **sds@miamioh.edu (mailto:sds@miamioh.edu)**.
- The following resources are available for you as a student:

- **Rinella Learning Center Academic Support** (https://miamioh.edu/student-life/rinella-learning-center/academic-support/index.html)
- **Howe Center for Writing Excellence** (http://miamioh.edu/hcwe/)
- **International Student Resources** (https://miamioh.edu/academics/intl-student-resources/index.html)
- **Student Success Center** (https://miamioh.edu/emss/offices/student-success-center/about/index.html)
- Current SDS registered students should request accommodations according to SDS procedure. You are strongly encouraged to request and discuss your accommodations needs during the first 1-2 weeks of the semester.
- **Note**: Homework is not timed work and you will have 7-days to complete homework. Hence, unless mandated by SDS (in writing), I am unable to provide extensions for homework. This is to ensure that I am able to release solutions to all of the students in a timely manner so as not to impact the learning of many students enrolled in the course.

COVID Related Campus Policies

Miami University continues to monitor and respond to shifts in public health guidance from the Centers for Disease Control and Prevention (CDC) related to COVID-19.

Facial Coverings

See Miami University's **COVID-19 Campus Updates** (https://www.miamioh.edu/covid19/) page for more details.

Miami is in **high risk** situation which means wear a well-fitting mask indoors in public, regardless of vaccination status or individual risk. We'll adjust if the policy changes.

Physical Distancing

See Miami University's **COVID-19 Campus Updates** (https://www.miamioh.edu/covid19/) page for more details.

Miami is in **high risk** situation which means wear a well-fitting mask indoors in public, regardless of vaccination status or individual risk. We'll adjust if the policy changes.

Lecture recordings and usage policies

Currently, synchronous sessions will not be recorded. However, if this policy changes (due to COVID circumstances), such recordings/streaming will only be available to students registered for this class. The faculty member will provide you notice if any of these recordings/streaming will be shared with anyone outside of this course, and will obtain your prior written consent before sharing. These recordings are the intellectual property of the faculty member and Miami University and may not be shared or reproduced without the explicit, written consent of the faculty member and Miami University. Further, students may not share these sessions with those not in the class, or upload them to any other online environment. Doing so would be a breach of the Code of Student Conduct

Catalog Description:

Algorithm development and refinement in problem solving. Modular programming using sequence, selection, and repetition control structures. Program debugging and testing. Formatted input/output. Data files. Fundamental data types. User-defined data types: structured and enumerated. Arrays and arrays of structures. Simple sorting and searching algorithms. Character data and string processing. Algorithm efficiency considerations. Classes, objects, and introduction to object-oriented programming.

Course Objectives:

At the end of this course, students will be able to:

- Use and describe a contemporary programming language and programming environment.
- Identify and eliminate errors in programs.
- Implement clean and robust programs that solve a stated problem.
- Solve programming problems using a procedural approach.
- Describe, trace, and implement basic algorithms.
- Use API documentation.

List of Main Topics:

Here is a brief overview of the main topics to be covered in this course. A more detailed description of the course content is available on the **CSE website** (https://www.miamioh.edu/cec/academics/departments/cse/academics/course-descriptions/cse-174/index.html) .

- Programming Languages and the Programming Environment (1.0)
- Basic Language Elements (2.0)
- Control Structures (3.0)
- Testing and Debugging (1.0)
- Writing Methods (2.0)
- Arrays (3.0)
- Using objects (1.0)
- Exams (1.0)

Duty to Report

Resources and Support for Students

As an instructor, I have a **duty to report** (https://www.miamioh.edu/policy-library/employees/general-employment/non-discrimination/duty-to-report.html) . This means I am required to promptly report to the Deputy Title IX Coordinator (**titleix@miamioh.edu** (mailto:titleix@miamioh.edu)) any information a student shares with me regarding harassment, discrimination, sexual misconduct and interpersonal violence, or retaliation. **A report does not initiate an investigation. It engages a discussion of your resources, supportive measures, and options available.** If students want to speak with someone confidentially, the following resources are available on and off campus:

- **Student Health Services** (https://gnldr.online/tracker/click?redirect=https%3A%2F%2Fmiamioh.edu%2Fstudent-life%2Fstudent-health-service%2Findex.html&dID=1578667353841&linkName=Student%20Health%20Services) , **(513) 529-3000** (https://www.google.com/search?q=Miami+University+Student+Health&rlz=1C1GCEB_enUS814US814&oq=Miami+University+Student+Health&aqs=chrome..69i57j46i39i175i199j0l3j69i60l2j69i61.5685,8)
- **Student Counseling Services** (https://gnldr.online/tracker/click?redirect=https%3A%2F%2Fmiamioh.edu%2Fstudent-life%2Fstudent-counseling-service%2F&dID=1578667353841&linkName=Student%20Counseling%20Services) , **(513) 529-4634** (https://www.google.com/search?rlz=1C1GCEB_enUS814US814&sxsrf=ALeKk02sACQS4DV0liKgWpTJGcUqvNjG1Q%3A1603376956794&ei=PJeRX8z8L4iPtAaSgpioDQ&q=Miami+University+Studer ECaABwAngAgAFbiAH_CpIBAjE4mAEAoAEBqgEHZ3dzLXdpesgBCMABAQ&sclient=psy-ab&ved=0ahUKEwjMis3PtMjsAhWIB80KHRIBBtUQ4dUDCA0&uact=5)
- Women Helping Women (WHW) Sexual and Interpersonal Violence Support Specialists are available to support all students and can be contacted by emailing mu@womenhelpingwomen.org. As well as calling/texting 513-846-8402 between 9AM-5PM. The 24-hour hotline is 513-381-5610. WHW supports ALL survivors of dating/domestic violence, sexual assault, and stalking, regardless of gender identity or sexual orientation.

Speaking with a confidential resource person does not preclude students from making a formal report to the University if and when they are ready.

https://miamioh.edu/diversity-inclusion/programs-resources/report-incident/index.html (https://miamioh.edu/diversity-inclusion/programs-resources/report-incident/index.html)

For more information, please visit **https://miamioh.edu/campus-safety/sexual-assault/** (https://miamioh.edu/campus-safety/sexual-assault/) and **https://www.miamioh.edu/diversity-inclusion/oeeo/index.html** (https://www.miamioh.edu/diversity-inclusion/oeeo/index.html) .
