Class location & Hours:

Wednesday Labs BEN009	• 10:05 - 11:25 (A) • 11:40 - 1:00 (B) • 1:15 - 2:35 (C)
Friday Lecture McVey DSB 166	• 10:05 - 11:25 (A) • 11:40 - 1:00 (B) • 1:15 - 2:35 (C)

Instructor:

Kurt Johnson
Office: McVey DSB 394
Email: **johnsok9@miamioh.edu (mailto:johnsok9@miamioh.edu)**

(mailto:johnsonk9@miamioh.edu)

Description:

An introduction to the software, concepts and methodologies necessary to design and implement web applications. Students will design and construct web applications utilizing remote servers on multiple platforms. Projects will be used to enable the students to apply the principles and techniques presented in class.

This is a great class which covers a wide range of topics all related to web programming. We will start with the basics and underpinnings of networks, sockets, http, html, javascript, jquery, ajax and more. We will also be setting up cloud servers and using their platform as a working location for our code and systems.

Online help	For seeking help or clarifying questions on homework and lab exercises always start with the discussion forums on Canvas. The discussion forums should be your first step for seeking help electronically.
Scheduled office hours:	Tue: 11:00 am to 2:00 pm (EST) Thu: 10:00 am to 1:00 pm (EST) **https://calendar.google.com/calendar/u/0/selfsched?sstoken=UUlyWWJGQnV4RjZvfGRlZmF1bHR8ZDY2YTg1M2E5NTI5ZmEyZjAzMjQ2YzY1YTIxYmZlOGI (https://calendar.google.com/calendar/u/0/selfsched?sstoken=UUlyWWJGQnV4RjZvfGRlZmF1bHR8ZDY2YTg1M2E5NTI5ZmEyZjAzMjQ2YzY1YTIxYmZlOGI)**
By Appointment:	I am available outside of these hours also - send an email to ask questions or set up a zoom meeting.
Open door policy:	If you stop by and I am not busy, I will gladly help you and answer your questions.

Resources and Support for Students

As an instructor, I have a **duty to report (https://www.miamioh.edu/policy-library/employees/general-employment/non-discrimination/duty-to-report.html)** . This means I am required to promptly report to the Deputy Title IX Coordinator (**titleix@miamioh.edu (mailto:titleix@miamioh.edu)**) any information a student shares with me regarding harassment, discrimination, sexual misconduct and interpersonal violence, or retaliation. **A report does not initiate an investigation. It engages a discussion of your resources, supportive measures, and options available.** If students want to speak with someone confidentially, the following resources are available on and off campus:

- **Student Health Services (https://gnldr.online/tracker/click?redirect=https%3A%2F%2Fmiamioh.edu%2Fstudent-life%2Fstudent-health-service%2Findex.html&dID=1578667353841&linkName=Student%20Health%20Services)** , **(513) 529-3000 (https://www.google.com/search?q=Miami+University+Student+Health&rlz=1C1GCEB_enUS814US814&oq=Miami+University+Student+Health&aqs=chrome..69i57j46i39i175i199j0l3j69i60l2j69i61.56858#)**

- **Student Counseling Services (https://gnldr.online/tracker/click?redirect=https%3A%2F%2Fmiamioh.edu%2Fstudent-life%2Fstudent-counseling-service%2F&dID=1578667353841&linkName=Student%20Counseling%20Services)** , **(513) 529-4634 (https://www.google.com/search?rlz=1C1GCEB_enUS814US814&sxsrf=ALeKk02sACQS4DV0liKgWpTJGcUqvNjG1Q%3A1603376956794&ei=PJeRX8z8L4iPtAaSgpioDQ&q=Miami+University+Studer ECaABwAngAgAFbiAH_CpIBAjE4mAEAoAEBqgEHZ3dzLXdpesgBCMABAQ&sclient=psy-ab&ved=0ahUKEwjMis3PtMjsAhWIB80KHRIBBtUQ4dUDCA0&uact=5#)**
- Women Helping Women (WHW) Sexual and Interpersonal Violence Support Specialists are available to support all students and can be contacted by emailing mu@womenhelpingwomen.org. As well as calling/texting 513-846-8402 between 9AM-5PM. The 24-hour hotline is 513-381-5610. WHW supports ALL survivors of dating/domestic violence, sexual assault, and stalking, regardless of gender identity or sexual orientation.

Speaking with a confidential resource person does not preclude students from making a formal report to the University if and when they are ready.

https://miamioh.edu/diversity-inclusion/programs-resources/report-incident/index.html (https://miamioh.edu/diversity-inclusion/programs-resources/report-incident/index.html)

For more information, please visit **https://miamioh.edu/campus-safety/sexual-assault/ (https://miamioh.edu/campus-safety/sexual-assault/)** and **https://www.miamioh.edu/diversity-inclusion/oeeo/index.html (https://www.miamioh.edu/diversity-inclusion/oeeo/index.html)** .

Academic Integrity

- Assignments should be solved using the specific techniques and algorithms you have been learning in class. Don't search for solutions online because: you won't learn the right concepts, your code will likely not work as specified, and this is considered a violation of the **Academic Integrity Policy (http://miamioh.edu/cec/academics/departments/cse/academics/academic-integrity/index.html)** .
- Don't share your code with anyone on homework projects. Don't ask for someone else to share their code. Attempts to copy code and then change it to look slightly different nearly always fail, and lead to students being found responsible for a violation of the **Academic Integrity Policy (http://miamioh.edu/cec/academics/departments/cse/academics/academic-integrity/index.html)** .
- Don't post assignments or solutions to sites like Chegg or CourseHero because that is considered a violation of this course's **Academic Integrity Policy (http://miamioh.edu/cec/academics/departments/cse/academics/academic-integrity/index.html)** . Plus, did you know that Miami's Academic Integrity office has full access to the materials on such sites?
- Don't reuse your old work or someone else's old work for this class, because doing so is considered a violation of the **Academic Integrity Policy (http://miamioh.edu/cec/academics/departments/cse/academics/academic-integrity/index.html)** .
- **YOU MAY use ChatGPT but must disclose it - or else it is the same as having someone else do your homework**
- In the CSE department, the default penalty for a first-time violation of the Academic Integrity policy is: a score of zero for the assignment/exam/quiz *and* a reduction in the student's final grade of a full letter grade (for example, a C- would become a D-).

Miami University Learning Community

Miami University is committed to fostering a supportive learning environment for all students irrespective of individual differences in gender, race, national origin, religion, handicapping condition, sexual preference, or age. Students should expect, and help create a supportive learning environment free from all forms of prejudice. Disparaging comments, sexist or racist humor, or questioning the academic commitment of students based upon these individual differences undermines our learning community. If such behaviors occur in class, please seek the assistance of your instructor or department chair.

Teaching Assistant(s):

Ensure you read the **University policy and legal recourse information (https://miamioh.instructure.com/courses/100303/assignments/syllabus#ta_policies)** further below in this syllabus to understand the roles of TAs. In general, all late submissions and grading questions must be directed to your instructor and never to your TA.

List of Teaching Assistants:

Noah Greenbaum: **greenbn3@miamioh.edu (mailto:greenbn3@miamioh.edu)**

Kian Metcalfe: **metcalkt@miamioh.edu (mailto:metcalkt@miamioh.edu)**

Michael Clisham: **clishamj@miamioh.edu (mailto:clishamj@miamioh.edu)**

- On Demand - email for information

Note: TAs are not available for private tutoring sessions or for private meetings for help. Set up such requests/appointments with Mr. Johnson instead.

Prerequisites:

1. CSE 278: Systems 1 (intro. to networking & databases important)
2. Good knowledge of C++ programming under Linux. It is highly recommended students complete CSE-278 (System 1) prior to taking this course.
3. Working with Linux at the command prompt
4. Good technical writing skills, including creating charts and graphs.
5. Familiarity with general computing concepts and terminology
6. Excellent knowledge of using online resources, websites, manuals, etc.

Official Communication:

All the official communication in this class will be performed electronically in the following 2 primary forms:

- Canvas will be the primary mechanism for announcements, schedule changes, and other information that pertains to the whole class
- Via your MU email address only (to ensure compliance with FERPA guidelines). It is your responsibility to check your MU email often, every day.

Important Dates

Wed Jan 31	First day of class
Thu Feb 15	Last day to drop course with no grade
Mar 25-31	Spring Break
Mon Apr 8	Last day to withdraw from course (course grade will be “W”)
May 13-16	**Final project presentation**

Textbook: No required textbook, I will provide materials from many] sources

Additional References:

-
- Other reference materials will be posted on the course web site. The course may use multimedia materials including videos. Therefore please be prepared to deal with standard web-based technologies.

Policies

Attendance

Any student missing either more than 5 labs or lectures, or three in a row, will be dropped from the course for non-attendance. You may contact me for exceptional reasons.

No student, faculty, staff member who is ill or has been in close contact with an individual who has tested positive for COVID-19 should attend class or come to campus . Instructors will, without prejudice, provide students with reasonable opportunities for completing missed work. However, students are ultimately responsible for material covered in class, regardless of whether the student is absent or present. If your absence is of significant duration or severity, as your instructor, I will advise you about other options that might be available including assigning an incomplete grade or requesting a medical withdrawal.

Facial Coverings

Refer to the current Miami Covid rules:

https://www.miamioh.edu/policy-library/employees/general-employment/miscellaneous/covid-19.html (https://www.miamioh.edu/policy-library/employees/general-employment/miscellaneous/covid-19.html)

This class includes a variety of exercises designed to facilitate your understanding of web programming. The course includes homework assignments as well as labs and quizzes . The grade distribution for the various categories is shown in the table below (approximate based on 660 points total).

Grade distribution:

This class includes a variety of exercise designed to facilitate your understanding of web programming. The course includes homework assignments as well as labs and quizzes . The grade distribution for the various categories is shown in the table below (approximate based on 660 points total).

Category	Weight
Labs	25%
Homework	20%
Quizzes	5%
Exams	25%
Final Project:	25%

Grade scale:

Your final letter-grade in this course will be determined as shown in the table below. **Note that, there will be no grade curving or individual adjustments at the end of the course.**

Weighted Score	Grade	Weighted Score	Grade	Weighted Score	Grade
97-100	A+	93-96.99	A	90-92.99	A-
87-90	B+	83-86.99	B	80-82.99	B-
77-80	C+	73-76.99	C	70-72.99	C-
67-70	D+	63-66.99	D	60-62.99	D-
0-59.99	F				

Attendance Policy:

- This course will be treated as a face to face course, unless changed by ongoing rules. There is required attendance. There will be quizzes and other attendance items during lectures and labs.
- *Weather & Other Emergency Closing*: In case of an unplanned weather or another emergency closing, all the policies and procedures of the University will be followed, as stipulated in **Emergency Procedures (http://miamioh.edu/campus-safety/emergency-procedures/)** . It is your responsibility to track emergency notifications from the University to determine if classes are canceled. University policy does not excuse missing even one class due to weather issues near your residence or travel route. Consequently, when classes are not canceled by the University but you have a weather emergency near your residence, then use your discretion on attending while noting that it is not an excused absence (as per University policy) and any in-class work will be marked with a zero score.

Interacting with TAs & graders:

Your course may include TAs or graders who will work with your instructor to provide you with the best educational experience and all the support possible to help you succeed in the course. However, it is imperative to remember the following important protocols when interacting with TAs:

- The TAs may be your friends outside the class settings. However, in all aspects directly or indirectly related to the course they to be treated as if they were your instructor.
- It is important to remember that the TAs/graders are employees of Miami University. Therefore, they have legal protection (and obligations that go with it) from the University and they can seek legal recourse for any forms of discrimination or untoward conduct.
- The role of the TAs/graders is to help you learn. They are clearly instructed not to provide solutions. Consequently, asking the TA "Can you give me the answer to this question?" violates ethical conduct expected of you. Instead, the question should be "Can you help me find resources to learn and answer this question?"
- The TAs/graders do not have any role in policy matters, due dates, deadlines, grade disputes etc. If a question does not solicit help, you should not be sending them to a TA/grader. For example, emailed delayed submission to a TA violates ethical conduct expected from you.

Policies for Lab Exercise & (Pop) Quizzes:

The course will consist of a combination of lectures, labs (short assignments), homework (longer assignments) and exams. All in-class quizzes are to be individual work. No reference materials or discussions will be permitted. Unless stated otherwise, use of electronic devices during quizzes is prohibited.

- You are to read and agree to abide by **Miami's Computer Responsible use of computer resources policy (http://miamioh.edu/policy-library/administration-operations/it-services/responsible-use-university-computing-resources.html)** .

- Labs may be discussed with class members, while homework and projectys are to be done individually and you agree to follow Miami's policy on student academic misconduct (separate module in canvas)
- I will be comparing programs - if your program is substantially similar to another student then we will have an academic misconduct case
- We will be using real machines, you should use the administrator rights on these machines responsibly and in accordance with Miami Policies

The default penalty for any instance of academic dishonesty in CSE will be a zero on the assignment followed by a reduction of a full letter grade in the course. This will be the case whether the judgment is reached in the Office of Academic Integrity or by the department chair.

Policies for Homework:

Most of the homework will require designing and implementing programs. In addition, several programming exercises will require performance evaluation and report writing about the programs. Furthermore, certain homework may require additional reading and writing essays. The following policies will be strictly followed for all homework:

- *General Policies*:
  - All assignments have due dates - this is when you should finish the assignment
  - **Every assignment (except the final project) may be turned in up to 3 days later (by 11:59pm Oxford time) without a loss of points.**
  - **There is no extension beyond the three day grace period.**
  - **Due date is when you should turn it in, available until is the final acceptance date.**
  - ☛ Starting early is critical for successfully completing the homework.
  - Work alone. You may help one another **but without sharing any code**.
  - Use the Canvas online discussion forums in for a homework to seek general clarifications or help to troubleshoot a specific compiler error.
  - All programs must adhere to good programming practices, style (see **CSE Programming Style Guide (http://miamioh.edu/cec/academics/departments/cse/academics/programming-style/index.html)**), and use good documentation suitable for a particular language.
- *Coding standards*: All programs must adhere to good programming practices, particularly:
  1. Coding practices (see **CSE Programming Style Guidelines (http://miamioh.edu/cec/academics/departments/cse/academics/programming-style/index.html)**) will be enforced in the course using automatic scripts.
  2. Use good documentation suitable for a particular language.
  3. Must contain a design that is clear and concise.
- *Late submission*:
  - **Assignments (labs or homework) may be turned in up to 3 days after the due date without penalty.**
  - They will not be accepted after those dates. Those dates will be visible in the assignment dates. Due date is when you should turn it in, available until is the final acceptance date.
  - Exams may only be missed with a valid excuse.
  - The final exam cannot be made up or completed late.
- *Outside Help*: Discussion of course related material is encouraged. However, sharing of assignments and/or answers is strictly prohibited. Students are expected to use good judgment with regard to receiving outside help. Programs that are essentially identical are considered to be the work of another, and will be treated as academic dishonesty. Please refer to the **Miami Student Handbook (http://www.miami.muohio.edu/documents_and_policies/handbook/)** for a detailed description of student expectations.
- *Help via Emails*: I will provide help and direction for programming projects via email. However, the following policy applies for obtaining help via email for homework related issues:
  - Response to emails received after business hours (8-5), during holidays, and weekends may be delayed.
  - I do not respond to emails on Sunday

Exam Policies:

- *General Policies*: Two exams and a final project will be administered for this course. The only acceptable excuse for missing the scheduled exam and to request makeup exam is that it conflicts with another course. I will excuse only those for whom there is no other alternative. Begin to arrange your schedule now (work, meetings, interviews, etc.). If you require a makeup exam, you must obtain written (via email) permission from me prior to the test. Unexcused, missed exams will be recorded with zero points.

The exams will be closed book possibly using proctorio when remote, otherwise we will use a scheduled exam time. Electronic devices for life support or medical equipment will be permitted when appropriate documentation is provided.

- *Makeup Exams*: Requesting makeup exams/quizzes is discouraged and will be allowed only under the following extraordinary circumstances:
  1. An unexpected, documented medical emergency arises
  2. Provable extenuating circumstances.

  Note, that makeup exams are not guaranteed and require a legitimate, documented reason. In all cases, students are responsible for informing the instructor no later than 24 hours prior to a scheduled exam.

- *Final Exam Policy*: The University policy for the final exam is that no exam may be administered early except with written permission from the Associate Dean of the division. **This permission is typically not given except under extraordinary circumstances**.
  - *In-class Exercise*: Unless otherwise stated, all in-class exercise are to be individual work. However, you are permitted to discuss aspects of the exercise with your neighbors in class. Appropriately helping your neighbor without affecting your own performance is desired.
  - *Preparation*: You are expected to closely track the class progress and review the materials before and after each class.
- ☛ *Taking Notes*: I use in-class electronic presentations to give you some basic information. These are not a substitute for taking notes.
  - **Take notes during lectures.** Taking notes helps to reinforce core concepts for the course.
  - Lab activities will often depend on you to use what you wrote in the lecture.
  - Good notes can have a positive impact on your grade.
  - "Good notes" does not mean "Write everything". Be selective.
  - Focus on writing sample code, diagrams, "notes to self".

COURSE OBJECTIVES AND OUTCOMES

✏ **General Information (https://miamioh.instructure.com/courses/100303/assignments/syllabus#general)** ✏ **Policies (https://miamioh.instructure.com/courses/100303/assignments/syllabus#policies)** ✏ **Objectives (https://miamioh.instructure.com/courses/100303/assignments/syllabus#objectives)** ✏ **Tentative schedule (https://miamioh.instructure.com/courses/100303/assignments/syllabus#schedule)**

Catalog Description:

An introduction to the software, concepts and methodologies necessary to design and implement web applications. Students will design and construct web applications utilizing remote servers on multiple platforms. Projects will be used to enable the students to apply the principles and techniques presented in class.

Course Objectives:

At the end of this course, students will be able to:

1: To be able to describe and use technologies to implement Web Applications

2: To be able to implement web applications utilizing contemporary technologies and tools

3: To be able to describe and create programs that utilize proper error and security procedures as related to web applications.

List of Main Topics:

Topics:

- Introduction/Overview
  - Sockets and HTTP
- Web
  - Html
  - CSS
    - Bootstrap / Foundation
  - Responsive designs
  - ADA issues
- Server Side

  - Intro to Scripting language such as PHP
  - Database Driven Sites
  - Handling Forms
  - Sessions
  - Authentication
  - MVC design pattern
  - Templating
- Javascript
  - DOM manipulation
  - Event Handling
  - Form Handling
  - JQUERY
- AJAX Applications
- Frameworks
  - Such as AngularJS / Backbone / Ember / Ionic
  - Bootstrap
- REST interfaces
- Security
  - authentication
  - Safely Handling Sessions
  - Safely Handling Data Provided by Users
  - HTTPs and mixed http/https issues

Course summary:

Date	Details	Due
Fri, 2 Feb 2024	Lab Module 1 - Linux (https://miamioh.instructure.com/courses/213590/assignments/2668291)	due by 23:59
Fri, 9 Feb 2024	Module 2 Quiz (https://miamioh.instructure.com/courses/213590/assignments/2668243)	due by 23:59
	Lab Module 2 - Git/Sockets (https://miamioh.instructure.com/courses/213590/assignments/2668298)	due by 23:59
Mon, 12 Feb 2024	HW Module 2 - Sockets (https://miamioh.instructure.com/courses/213590/assignments/2668279)	due by 23:59
Fri, 16 Feb 2024	Module 3 Quiz (https://miamioh.instructure.com/courses/213590/assignments/2668244)	due by 23:59
	Lab Module 3 - Html (https://miamioh.instructure.com/courses/213590/assignments/2668299)	due by 23:59
Mon, 19 Feb 2024	HW Module 3 - Git/Html (https://miamioh.instructure.com/courses/213590/assignments/2668280)	due by 23:59
Fri, 23 Feb 2024	Lab Module 4 - CSS (https://miamioh.instructure.com/courses/213590/assignments/2668300)	due by 23:59
Fri, 1 Mar 2024	Module 5 Quiz (https://miamioh.instructure.com/courses/213590/assignments/2668237)	due by 23:59
	Lab Module 5 - Forms (https://miamioh.instructure.com/courses/213590/assignments/2668301)	due by 23:59
Mon, 4 Mar 2024	HW Module 5 - Forms/Bootstrap (https://miamioh.instructure.com/courses/213590/assignments/2668283)	due by 23:59

Date	Details	Due
Fri, 8 Mar 2024	Exam 1 Section C (https://miamioh.instructure.com/courses/213590/assignments/2730281)	due by 14:40
Mon, 11 Mar 2024	Lab Module 6 - Bootstrap (https://miamioh.instructure.com/courses/213590/assignments/2668302)	due by 23:59
Fri, 15 Mar 2024	Lab Module 7 - JavaScript (https://miamioh.instructure.com/courses/213590/assignments/2668303)	due by 23:59
